

OMAR SERRANO

AI & Automation Developer · Full-Stack Engineer

Toronto, ON, Canada · +1 437-660-1074 · omarion.montoya@gmail.com

Portfolio: omarserrano.ca · LinkedIn: linkedin.com/in/omar-serrano-toronto · GitHub: github.com/Omarion9000

PROFESSIONAL SUMMARY

Bilingual EN/ES full-stack developer specialized in AI integration and workflow automation. Currently building **Francaisia** (TEF Canada French exam prep platform, soft-launch July 2026) and **PRAVÉ** (live production SaaS for Canadian Express Entry CRS simulation with Stripe subscription billing). Experienced with AI virtual assistants using Anthropic Claude API. Microsoft Azure Fundamentals certified. I help businesses save 10+ hours per week with chatbots, voice agents, and custom web applications. Toronto-based, available for remote work worldwide.

TECHNICAL SKILLS

Frontend: Next.js (App Router), React, TypeScript, Tailwind CSS, framer-motion, XState, Responsive Design

Backend: Node.js, Express, REST APIs, PostgreSQL, Supabase (auth, database, RLS)

AI & Automation: Anthropic Claude API, OpenAI API, Prompt Engineering, Conversational AI, n8n, Make, Vapi, Twilio

Cloud & DevOps: Microsoft Azure (AZ-900 certified), Vercel, Stripe, Render, Git, GitHub, Linux, Agile / Scrum

Other: Python (AI scripts), CI/CD basics, i18n (EN/ES/FR), Testing (Vitest, RTL), Cross-functional collaboration

Languages: English (Fluent) · Spanish (Native) · French (Basic, building toward B2)

FEATURED PROJECTS

Francaisia — TEF Canada French Exam Prep Platform francaisia.com

Solo-built · Pre-launch · Soft launch July 2026

- Production-grade French learning platform targeting B2 / CLB7 readiness for the TEF Canada exam, with 92 lessons across A0–B2 levels and a full Quebec narrative arc
- Built with Next.js 16 App Router, Supabase (Postgres + RLS), Stripe live billing, and Anthropic Claude API for content generation; deployed on Vercel
- Designed lesson engine with custom progression logic, ~890 AI-generated voice audio files (Pierre voice), and full i18n (EN/ES/FR)
- Pedagogical decisions evaluated against B2 / CLB7 exam readiness throughout

PRAVÉ — Express Entry CRS Simulation Platform pravepath.ca

Solo-built production SaaS · Subscription-based (\$9.99 CAD/month)

- Architected full-stack platform with Next.js App Router, Supabase (auth + database + Row-Level Security), and Stripe billing integration
- Designed bilingual EN/ES interface with custom CRS calculation engine covering FSW, CEC, and PNP pathways across 11 provinces
- Implemented AI-powered scenario analysis layer using Anthropic Claude API for personalized score-improvement recommendations
- Full CICC legal compliance audit (PIPEDA disclosures for Supabase and OpenAI); deployed and maintained on Vercel with monitoring, custom domain, and SSL

Sofia — Bilingual AI Receptionist omarserrano.ca

Live demo for service businesses (dental, salons, clinics)

- Built conversational agent with Anthropic Claude API featuring 20-message conversation context and bilingual EN/ES auto-detection
- Implemented serverless API on Vercel with rate limiting (10 messages/hour per visitor) and friendly bilingual error handling
- Cost-controlled architecture using Claude Haiku model; operates under \$2/month at projected traffic

Pokémon Battle Arena pokemon.omarserrano.ca

Open-source portfolio project · github.com/Omarion9000/pokemon-arena

- Gen 1 turn-based battle simulator with TCG-style holographic card UI; 151 Pokémon prerendered as Server Components for sub-100ms TTFB
- Built battle engine with XState v5 (PP, priority, speed ordering, Struggle, forced switch) and pure damage calculation with full Gen 1 type chart
- Stack: Next.js 14 App Router, TypeScript strict mode, Tailwind, XState v5, Zod validation, Vitest — 77 tests passing

Jesse Merineau — Music Artist Website jessemerineau.omarserrano.ca

Client work delivered via Meraki Creative Lab

- Built responsive multi-page site (Home, About, Gallery, Songs, Videos, News) with React Router, Spotify embed integration, and YouTube featured video
- Stack: Vite + React + TypeScript + Tailwind CSS; deployed on Vercel with Git LFS for heavy assets

PROFESSIONAL EXPERIENCE

Founder — PRAVÉ & Francaisia (Self-employed)

May 2025 – Present

Toronto, ON, Canada

- Founded and built two production-grade SaaS platforms end-to-end: PRAVÉ (Canadian immigration CRS optimization, live with Stripe billing) and Francaisia (TEF Canada French exam prep, soft-launch July 2026)
- Architected full product stack: Next.js 16 App Router, Supabase (auth + Postgres + RLS), Stripe live integration, Anthropic Claude API for AI features, deployed on Vercel
- Designed and shipped trilingual UX (EN/ES/FR) with i18n middleware, custom CRS calculation engine, and AI-powered scenario analysis
- Owned full business operations: product strategy, legal/compliance (PIPEDA, CICC), payment infrastructure, content production, and pre-launch marketing

Web Developer — Meraki Creative Lab

Mar 2023 – Apr 2025

Remote · Mexico City, Mexico

- Led development on client web projects using Next.js, React, TypeScript, and Node.js, delivering multiple production websites end-to-end
- Designed and implemented REST APIs and database schemas with Node.js, Express, and PostgreSQL
- Collaborated in Agile environment with Git workflow and continuous deployment via Vercel
- Coordinated scope, timelines, and revisions directly with clients in both English and Spanish

Customer Service Associate (part-time) — The Rec Room

Aug 2023 – May 2026

Toronto, ON, Canada

- Provided bilingual EN/ES customer service in a high-volume entertainment venue
- Maintained alongside full-time studies and developer roles; demonstrated reliability and time management

EDUCATION

Diploma in Computer Programming — Georgian College

Sept 2023 – Apr 2025

Toronto, ON, Canada

Bachelor in International Trade — ESCI University

2018 – 2022

Mexico

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900) — Microsoft
- Frontend Developer Diploma — freeCodeCamp
- JavaScript Algorithms and Data Structures — freeCodeCamp
- Responsive Web Design — freeCodeCamp
